

StreetPass Party, the card app for 3DS

Guide to the new update

(This guide was made with AI, I was too lazy to do it by hand and didn't have time lol)

What's new, where everything is and how to do it, step by step.
Keep it handy with your 3DS on.

The website is in Spanish, English, French and Italian: switch it at the top
(**ES** • **EN** • **FR** • **IT**). The website screenshots in this guide are in English.

¡Que vuelva el StreetPass!

1

Install and update

This is the last time you'll need FBI. From this version on, the app updates itself.

Don't have it yet, or on an older version?

- 1 On the StreetPass website, go to [The app](#).
- 2 On your 3DS, open **FBI**.
- 3 Pick [Remote Install](#) › [Scan QR Code](#).
- 4 Scan the "**Install (FBI)**" QR on the site.

It installs over the one you have: **you don't lose any cards, coins or achievements.**

No Wi-Fi?

Download the **.cia** from the site, copy it to your SD card and install it with FBI from

[Install CIA](#).

How to install it

Install (FBI)

First time: in FBI, *Remote Install* › *Scan QR Code*.

Already have it? Update it from the app itself: *Settings* › *Update*.

No Wi-Fi: download the **.cia**, copy it to the SD card and install it from FBI with *Install CIA*.

[Download the .cia](#)

You need a 3DS, 2DS or New 3DS with custom firmware. If you already had it, install over it: you won't lose anything. If you don't see "Check for update" in Settings, your version is older: update once with FBI.

The app, on the website. The QR to install with FBI. You no longer need any QR to update.

When a new version comes out

- 1 Open the app with Wi-Fi on.
- 2 You'll see the "**Update available**" notice and a dot on the gear.
- 3 Go to [Settings](#) › [Update](#). No QR needed.
- 4 It downloads and installs. It's about 28 MB and takes 1 or 2 minutes.
- 5 The app closes. Open it again from the HOME Menu.

Tip

Under 30% battery and no charger, it won't let you install. Plug it in before you start.

Updates are signed. Only install the official ones.

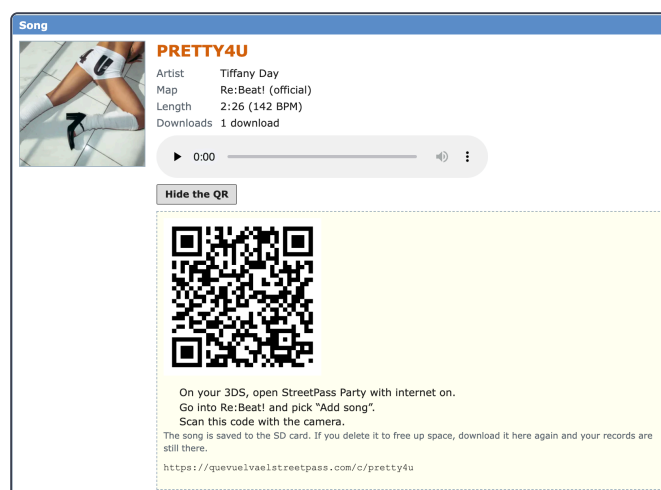

The rhythm game used to be called Cascada. Now it's Re:Beat!, with a new logo (the four arrows ← ↓ ↑ →), and you get the songs from the website.

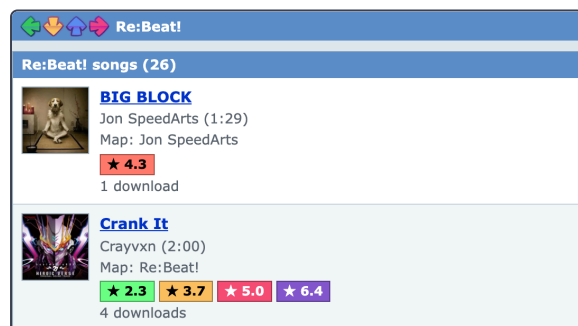

In **Games** there are now two big icons: **Minigames** (the usual list) and **Re:Beat!**. There are new songs, including **PRETTY4U** (Tiffany Day) and **BIG BLOCK** (mapped by @Jon_SpeedArts).

Get a song

- 1 On the site, go to **Songs** and pick one.
 - 2 Hit **Download**. A QR pops up.
 - 3 On your 3DS: **Re:Beat!** → **Add song**.
 - 4 Scan the QR. The song downloads over Wi-Fi.
- Running out of space? Delete songs and download them again whenever you want.
- Your high scores stay.**
- On the site, every song shows how many times it's been downloaded.

A song's page with the QR open. Below it, its difficulties and its ranking.

Songs, on the website. Difficulties no longer have names: they're shown in stars (★ 3.4); the more stars, the harder. Below, the download count.

Mods

Each one has its own icon:

No Fail

S or nothing

Speed x1.2

Nightcore

Dark

Hidden

Ranking

Every song has its own ranking. On top of that you get a **global rank**: the sum of your best scores. You'll find it on your profile on the website, e.g. **"#2 in the world"**.

Do you make maps?

On the site, **"Map your own"** (quevueivaelstreetpass.com/crear): upload the audio and the cover, map it in your browser and it goes live. Only your own songs, copyright-free or with permission.

3 Your cards

85 new cards from 19 new artists. You'll find them in packs.

@ViejoPoyoo

@Coret.gis

@Tilund

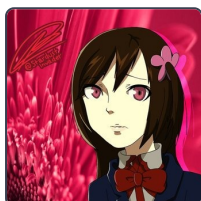

@karuba_art

@esmiturno.mx

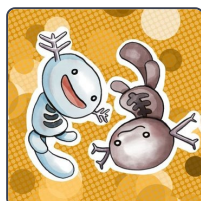

@amparograph

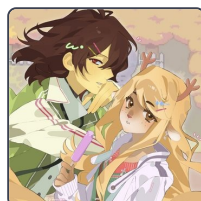

@StardustInvader

@kamicrush_

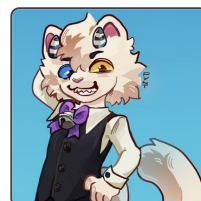

@carlos_filoso

@studioreik

@Especta_door

@Shiromiau14

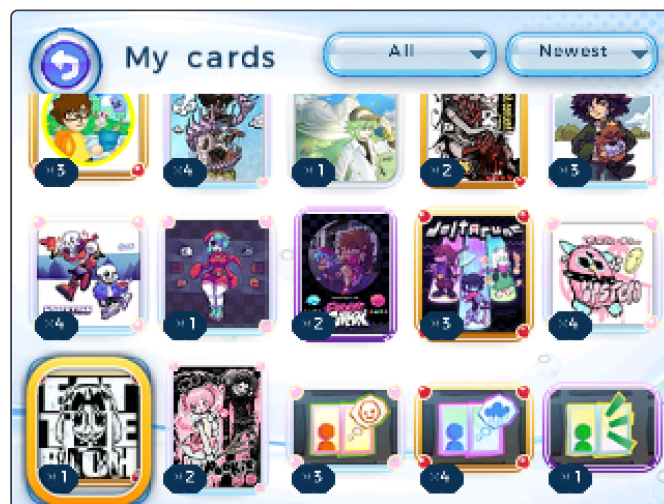

The 19 new artists:

@ViejoPoyoo @hggtheking @Coret.gis @RealODJ @pasku_epimeteofur @Tilund @nicolaidis06
@karuba_art @esmiturno.mx @amparograph @galerin @StardustInvader @kamicrush_ @duz___
@carlos_filoso @studioreik @Especta_door @tu_batido_fav @Shiromiau14

Thanks, everyone. Every card, with its artist, is on the website under [Cards](#).

The new collection (My cards)

- One slot per card. Bottom left, how many you have in total: **x7**.
- The list just keeps scrolling down, no pages.
- Move with the D-Pad or the Circle Pad. **L** and **R** jump rows. You can also drag with your finger.

My cards. Each slot shows its xN. The list keeps going down.

Open a card and use the menu

- 1 Press **A** on a card. It opens below and you see each rarity you have, with how many.
- 2 Press **A** on a rarity. A menu with icons pops up on the right: **Sell, Favorite, Upgrade, View, Delete** and **Close**.
- 3 **B** closes the menu. **B** again closes the card.

Card open. Below, its rarities and how many you have of each.

Rarity menu. Top to bottom: Sell, Favorite, Upgrade, View, Delete and Close.

4 Friends and online trades

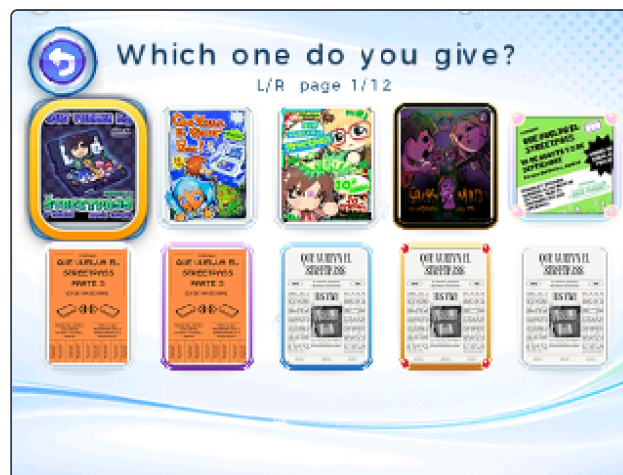

- Your friends are in two lists: **StreetPass** (people you met in person) and **Online friends**.
- In the Chat (PictoChat) you can see how many consoles are online right now.

Trade with an online friend

- 1 Open an online friend's profile and press **Trade**.
- 2 You see **their** collection, grouped like yours.
- 3 Open a card. Its rarities show up **in color** if you already have it in that rarity, and **in black and white** if you don't.
- 4 At the top there's a filter: **I don't have** (checks card and rarity) or **All**.
- 5 Pick the card and rarity you want.
- 6 In the same request, offer one of your cards and send it.
- 7 Your friend accepts or declines.

Asking for a card. The black-and-white rarity is the one you don't have yet. Top right, the filter.

What you offer. Pick one of your cards to give in return.

Tip

- The card you offer is put on hold while your friend decides, for up to 72 hours.
- Special prizes can't be traded.

5 Your account and linking your 3DS

Create your account

On the website, hit **Create account** and enter a name, email and password.

Names don't have to be unique. We recommend using your Instagram @ so your friends can find you.

Link your 3DS

Whenever you like: the same day or weeks later.

- 1 On your 3DS: **Settings** › **Link account**.
- 2 You get an 8-letter code. It lasts 10 minutes.
- 3 On the website, logged in, go to **Link console**.
- 4 Type in the code.

Expired? Get a new one. One account goes with one console.

On the 3DS

Settings › Link account

8 letters, valid for 10 minutes

On the website

Link console › type the code

Done

Your profile shows your 3DS photo and name, your cards, your friends and your high scores.

6

The website

quevuelvaelstreetpass.com

Your profile, tab by tab

Overview	Charts of your collection by group and by rarity, your Re:Beat! points and your global rank, like "#2 in the world".
Cards	All your cards by group, no duplicates, each one with its xN.
Songs	Every song you've played, with score, accuracy, rank and mods.
Drawings	Shows up if you've uploaded any.

Your friends and followers show on your profile too.

on StreetPass Party

Updated: 30 Oct 2026, 12:50

Card collection [See all](#)

Has **82 of 167** album cards (355 in total, counting duplicates).

By group

Meetup posters	9 of 9
Illustrations	72 of 153
Events and prizes	1 of 5

By rarity

Common	76 of 162
Rare	50 of 162
Epic	24 of 162
Legendary	8 of 164
Celestial	2 of 164
Limited	1 of 5

Counts different cards: a rare and a common of the same card count in both rarities.

Re:Beat! [See all](#)

#2 in the world

13,188,478 points, adding up their best game on each song and difficulty, compared with every console that has played.

A profile's Overview tab. On the left, the linked 3DS. On the right, the collection by group and rarity, and the Re:Beat! rank ("#2 in the world").

More on the website

- **Drawings:** upload yours (by uploading, you confirm they're yours).
- **Reporting:** drawings, songs and profiles have a [Report](#) button. No account needed.
- **Community:** Questions and Ideas chats, with images.
- **Notifications** (the bell): lets you know when someone follows you, plus other news.
- **News:** the latest one is always at the top of Home.
- **People:** follow whoever you want. You can search by name or by @.

7

Emulator, saves and troubleshooting

On an emulator

You can play and use the chat. But your scores don't count for the ranking and there are no trades.

Your save belongs to your console

If you copy the SD card to another 3DS, a new save starts there. When you go back to your console, yours is still there.

If installing or updating doesn't work

- 1 Install it again over the top with FBI. You don't lose anything.
- 2 Still not working? Ask on the website: [Community](#) › [Questions](#).

Cheat sheet: where everything is

First-time install	FBI › Remote Install › Scan QR Code "Install (FBI)" QR in The app
Install without Wi-Fi	FBI › Install CIA the .cia copied to the SD
Update	Settings › Update with Wi-Fi and battery
Get a song	Web: Songs › Download . 3DS: Re:Beat! › Add song
Sell, upgrade or delete	My cards: A on the card, A on the rarity, menu on the right
Trade	An online friend's profile › Trade
Link your 3DS	3DS: Settings › Link account . Web: Link console
Ask a question	Web: Community › Questions

@hggtheking

@pasku_epimeteofur

@galerin

@duz__

@tu_batido_fav

@amparograph

Thanks to the artists who draw the cards and to everyone who comes to the meetups.

¡Que vuelva el StreetPass!
